

Westfield Flight Academy
is an FAA
approved flight training
facility

Pro Pilot Course Outline

Private Pilot

A Private Pilot's Certificate allows you to be pilot-in-command of an airplane. This will be the evaluation course where you start to develop the skill sets needed to be a professional pilot.

Instrument Rating

Instrument rating refers to the qualifications that a pilot must have in order to fly under IFR (Instrument Flight Rules) a.k.a. FLYING THROUGH CLOUDS! A great step in your aviation career!

Commercial Pilot

A Commercial Pilot's License brings your flying up to a higher level and qualifies you to be paid for flying.

Multi Engine

Multi Engine training prepares you to handle engine failures and other system emergencies in a safe and controlled environment so you will have the skills to handle such events should you ever need to.

Intro to Turbo Prop

The Intro to turbo prop simulator course will teach the student about transport category aircraft systems and procedures. This will give the student the skills to move from general aviation style flying to professional airline flying.
